

Saddle Revitaliser

Product Information

Pellé Saddle Revitaliser is specifically formulated to nourish and restore saddles, tack and other leather equestrian equipment (not for use on suede or nubuck), helping to counter the drying effects prolonged use has on these articles.

Formulated using tanning oils and waxes that nourish the leather by restoring the original oils removed through prolonged wear, exposure to sunlight, and contact with human & horse skin. Regular use helps restore and revive the colour, flex and original patina of the leather.

The effectiveness and colour fastness has been proven using international standards - tested by New Zealand Leather & Shoe Research Association (LASRA) who operate under ISO 9002 & ISO/EMC 17025.

It is important to first clean the item with Pellé Saddle Cleaner removing surface dirt and body oils, as this allows the Pellé Saddle Revitaliser to be absorbed into the leather.

This product is compliant with European Union REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals) regulations, meaning it is safe for human and animal use.

Feature Benefits

- Specifically formulated Saddle Revitaliser which has proven effectiveness (tested and approved by LASRA)
- When used in conjunction with Pellé Saddle Cleaner, the Pellé Saddle Care system will help maintain the appearance of your equipment and keep it soft and pliable.
- Biodegradable
- Human & Animal safe (compliant to EU REACH regulations)
- No mess and easy too apply
