

Leather Cleaner

Product Information

Pellé Leather Cleaner is specifically formulated to deep clean finished and waxed oiled leather upholstery – removing body oils, grease and dirt without damaging or denaturing the leather finish as house hold cleaners do.

The cleaning effectiveness and colour fastness has been proven using international standards - tested by New Zealand Leather & Shoe Research Association (LASRA) who operate under ISO 9002 & ISO/EMC 17025.

When used in conjunction with Pellé Conditioner/Protector (finished leather) or Pellé Revitaliser (waxed / oiled leather) these products provide a comprehensive Leather Care system that has been shown to extend the wear life of upholstery leather up to five times compared to untreated leather (LASRA 2013).

This cleaner is easy to use, biodegradable and non-toxic, meaning it is safe for use on family surfaces. It also contains HealthGuard™ a full anti-bacterial, anti-fungal and anti-microbial agent which provides protection against mould and bacterial contamination.

Feature Benefits

- Industry leading leather cleaner (tested and approved by LASRA)
- When used in conjunction with Pellé Leather Conditioner / Protector or Revitaliser has been proven to extend wear life of upholstery leather up to five times.
- Non Toxic and Biodegradable
- No Mess
